About Me

I have always been passionate about technology and its ability to solve complex problems. As a computer science major, I have developed a strong foundation in programming languages such as C and C++. I am also experienced in object-oriented programming, data structures, and algorithms.

Education

Bachelors in Computer Science   **2021 - Current**
FAST - NUCES Karachi
CGPA: 3.1

Intermediate   **2019 - 2021**
Bahria College Karsaz
Percentage: 93.54%

Matriculation   **2017 - 2019**
Bahria College Karsaz
Percentage: 91.36%

Projects

Carpooling System

Tools: C & C++

The system matches users for ride-sharing based on their routes and schedules. It calculates the cost of the ride based on distance and passengers, helping users save money and reduce their environmental impact. OOP was also utilized in this project.

Plagiarizm.io

Tools: C++ & Pyhton

The plagiarism.io project compares uploaded text files to a database of existing documents, detecting instances of plagiarism and generating a report for users. It helps maintain academic or professional integrity by ensuring the originality of written content.
